Who Are We?

Why Trust Us?

At LINLINE Medical Systems, we are proud to be a leader in the medical laser industry.

With over 25 years of experience, we specialize in the development and manufacturing of high-quality medical lasers. Our expertise extends beyond technology—we have also established nearly 50 aesthetic medicine clinics across Europe, providing innovative and reliable care to our patients.

Our dedicated production and research & development (R&D) facility enables us to deliver some of the safest and most advanced technologies on the market. This rigorous approach has earned us recognition from renowned names in the medical field. In this brochure, you will discover firsthand the results and effectiveness of our methods. We hope you find the answers and solutions you are looking for to meet your aesthetic needs.

RecoSMA[®]

What is RecoSMA[®]?

RecoSMA[®] is a patented technology developed by LINLINE, designed to initiate true cellular regeneration. This innovative process promotes the creation of new cells, resulting in renewed, healthier, and higher-quality skin. This revolutionary technology stands as one of LINLINE's greatest strengths.

While widely used in the field of aesthetic medicine, RecoSMA[®] also has therapeutic applications, such as treating complex wounds like diabetic foot ulcers and burns. This highlights its versatility and proven effectiveness.

RecoSMA[®]

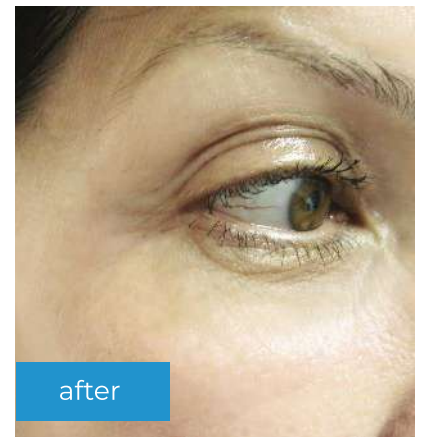

RecoSMA[®] is:

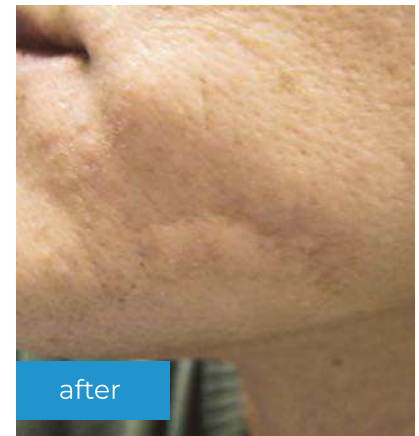

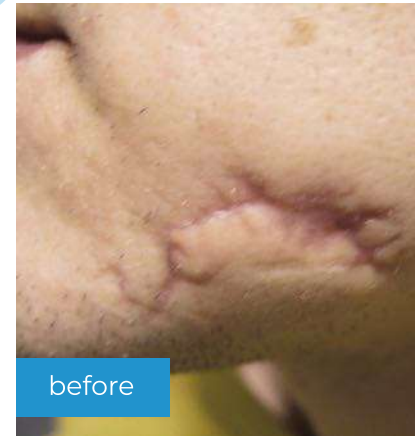

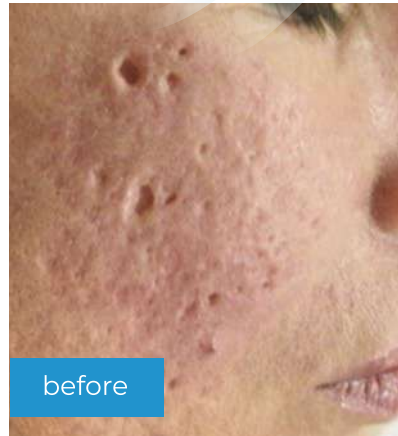

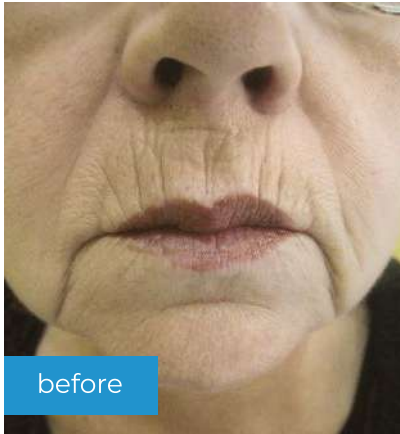

- Effective
- Painless
- Safe
- Applicable to the entire body and usable year-round
- Suitable for all phototypes
- Associated with a short recovery period

What does RecoSMA[®] treat?

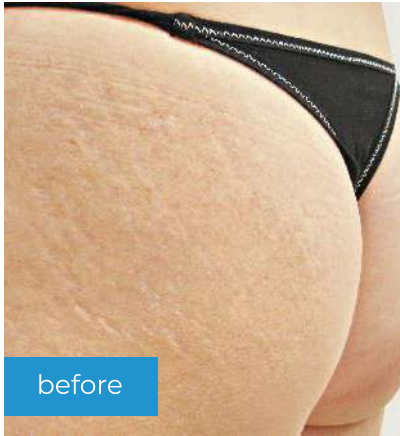

- Wrinkles (rejuvenation)
- Acne
- Stretch marks
- Scars
- Alopecia
- Skin laxity

LASER TREATMENT FOR VASCULAR LESIONS

LASER TREATMENT FOR VASCULAR LESIONS

- ! **The procedure is safe.**
- **It does not require anesthesia.**

Safety

The treatment is virtually painless and does not even require local anesthesia.

Suitable for children

This treatment is safe for children, even from their first year of life.

Effectiveness

Noticeable improvement can be seen after just one session.
The laser acts selectively on the blood within the vessels, coagulating it safely without damaging the surrounding tissues.

Quick results

Significant effects are achieved after the first procedure.

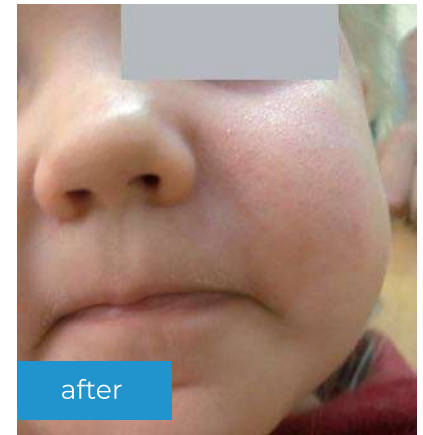

Laser selectivity

The laser does not heat the skin, targeting only hemoglobin, ensuring a precise and safe treatment.

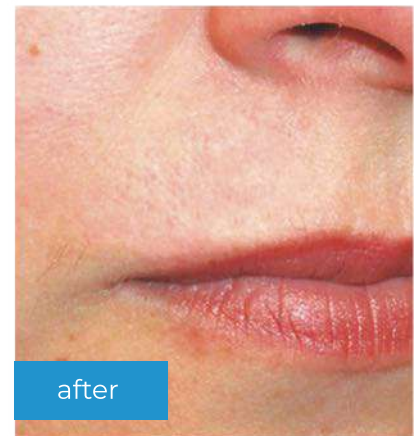

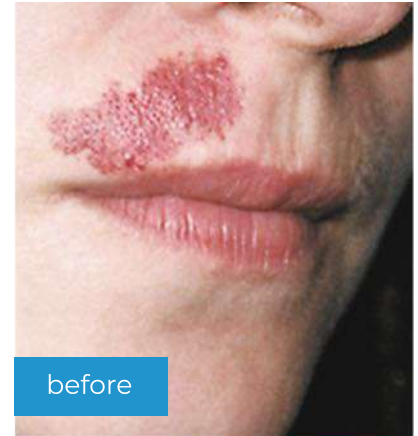

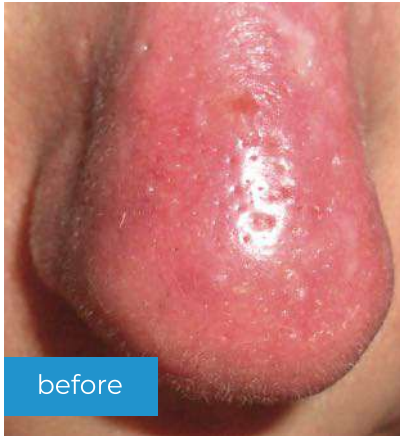

LASER TREATMENT FOR VASCULAR LESIONS

What are the indications?

- Angiodysplasia
- Hemangioma (including progressive types)
- Telangiectasia in various locations
- Rhinophyma
